

To whom it may concern:

This is a letter of recommendation to anyone who is looking to have the highest quality cabinetry, shelving, book cases or storage areas built into their existing structure.

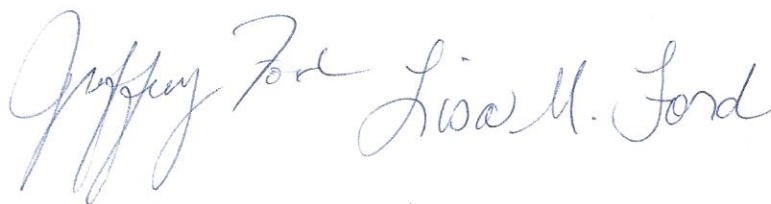

We built a custom home just over 1 year ago in Dublin, Ohio and Dan just happened to be one of the sub-contractors that put in a "built-in" book shelf at our request. As we lived in the home for a while we questioned ourselves as to why we didn't have this done in many other areas...five other places to be exact, including an entire wall in our lower family room.

We contacted Dan to see if he was interested, he gave us an exact estimate at a time that was convenient for us...and he understood exactly what we were looking for. Dan took the time to draw up the plans and bring them to life. The projects were done in much less time that both my wife and I had expected.

When the projects were being installed...it was unbelievable the amount of care and detail that went into it. We show our new built-in's to anyone and everyone...and the same question is always asked; "Did you have those custom made during the building process?" They look that original!

Our Thanks goes to Dan, and with it, a recommendation to anyone who is considering his services.

Sincerely,

Handwritten signatures of Jeffrey Ford and Lisa M. Ford. Jeffrey's signature is on the left, and Lisa's is on the right, both in cursive.
